

Land Managers Meeting

September 7, 2006

MidPeninsula Regional Open Space District, Los Altos, California

The purpose of this meeting is to provide information to land managers on Sudden Oak Death and *Phytophthora ramorum*, and to solicit input on future directions for management, research, and outreach. We will provide some light refreshments but you will need to bring a lunch. If you plan to attend the optional field trip in the afternoon, please bring sturdy walking shoes and sun protection, and be prepared to carpool.
