

SUDDEN OAK DEATH  
FIELD WORKSHOP  
Wednesday, Dec. 12  
10 am – 12 noon

Huddart County Park  
1100 Kings Mountain Rd.  
Woodside, CA  
(see directions)

**What:** This is a 2-hour field workshop to demonstrate treatment methods used to prevent Sudden Oak Death (SOD).

**Speaker:** Dr. Matteo Garbelotto, UCCE Specialist in Forest Pathology and Mycology, UC Berkeley. Dr. Garbelotto has conducted much of the research on SOD treatments and will share his findings. For the text of his study on SOD treatments, see *Arboriculture and Urban Forestry*, Vol. 33, No. 5 (2007).

**Rationale:** SOD cases have increased in the past year and more oaks are being considered for treatment. For treatments to be effective, a number of factors need to be considered. This workshop will address these factors and demonstrate application techniques in an outdoor setting.

**Registration:** This workshop is **FREE**, but registration is required. To register, call 650-726-9059 x101 and give your name and affiliation (company or organization). Or, send an email message to [wrotchstein@ucdavis.edu](mailto:wrotchstein@ucdavis.edu). Register ASAP – registration is on a “first-come/first-serve” basis, with a 100-person limit.

**Sponsors:** UC Cooperative Extension and San Mateo County Parks

**Coordinator:** Larry Costello, UC Cooperative Extension ([lrcostello@ucdavis.edu](mailto:lrcostello@ucdavis.edu))

**DPR and ISA Credits:** 2.0 units (applied for)

**Weather:** Our plan is to hold this workshop “rain or shine”. Please come prepared for wet weather.

**Directions:** From HWY 280 (north or south), take the WOODSIDE RD. exit and drive WEST. After about 1.5 miles, turn RIGHT on KINGS MOUNTAIN RD and drive up the hill (2.3 miles) following signs to Huddart Park. Turn RIGHT into Huddart Park, drive past the entry booth, and follow signs to the **WERDER SHELTER**. Parking areas are close to the shelter.
