

Sudden Oak Death-trained arborists and tree care professionals in your county

LAST UPDATED 3/17/2005

The following is a list of arborists and tree care professionals who have been through one of the COMTF training sessions, and who have given their names and contact information for this referral list. These persons are certified to recognize *Phytophthora ramorum* in the field, and are knowledgeable of the process for collecting and sending samples for analysis with the California Department of Agriculture. They are a resource in addition to the personnel listed in the County Contacts section of this binder, and those who do consulting or tree care work (**denoted by an asterisk [*]**) may be available to sample when County officials are not, because of workload and budgetary constraints.

Referrals are listed by county and city. Please note that while a person may be listed in a particular county and city, most folks work much further afield than that. If you are unable to find someone in your immediate area, try contacts in the neighboring counties as well.

Alameda County
