Undergraduate Internships & Assistantships in Natural Resource Management

Would you like to work directly with a community on natural resource management issues?

Florida A&M University awards national internships and research assistantships to undergraduate students from underserved communities who are interested in community-based natural resource management and issues of sustainability and social justice.

Students attending any U.S. college or university may apply.

These unique opportunities allow undergraduate students to work with either the community organization of their choice or with a professor doing research in the social science, economic, and/or natural resource fields at their college or university.

**Internship Information:**
- Student will work with grassroots, community organizations in community-based natural resource management (CBNRM)
- Students will learn first hand about how people in urban and rural communities work to conserve local natural resources to meet their own needs, resolve conflicts, and preserve and revitalize their cultural resources
- Students will help make a difference in how natural resource management affects local communities

**Assistantship Information:**
- Research Assistants will study issues in the social sciences, economics, and/or natural resources relevant to natural resource policy and practice in the U.S.
- Assistants will gain hands-on experience in research that utilizes participatory methods
- Assistants will learn first hand about how urban and rural communities work to conserve local natural resources to meet their own needs, resolve conflicts, and preserve and revitalize their cultural resources
- Assistants will help local communities build capacity for self-determination

**Eligibility:**
Faculty and students at any U.S. college or university, in any department, are eligible to apply. Individual grants of up to $6,200 will be awarded. The award includes a $1,000 honorarium to the professor or the community-based organization. All Assistants and Interns must attend an annual workshop, held in the fall. Travel expenses will be paid for by the program. Please see the website for additional information.

**Deadline:** April 16, 2007
