SUDDEN OAK DEATH
Field Meeting
Saturday, December 3, 1:00 p.m.
Joaquin Miller Park – Craib Picnic Area
(if raining, come to the Ranger Station)

Learn about Sudden Oak Death management
and see a demonstration on treatment techniques by the
UC Berkeley Forest Pathology and Mycology Laboratory

Background: In spring 2011, more than 400 community members collected nearly 2000 samples to analyze for Sudden Oak Death (SOD). SOD is a fungus-like mold that is killing oak trees in coastal California. Several samples from the upper Sausal Creek Watershed tested positive. Learn what you can do to help!

Call (510) 501-3672, visit www.sausalcreek.org, or email coordinator@sausalcreek.org
