From oxygen to food to shelter to energy to shade, plants provide us with virtually everything we need to survive and to thrive. Genetics and Plant Biology (GPB) majors study the distribution and diversity of plant life from the sub-molecular to the organismal level. There is momentous work to be done for those who want to unravel the mystery of genes, bring expertise to medical school, educate future biologists, or develop methods to feed the world!

Genetics and Plant Biology (GPB) combines traditional plant sciences (physiology, biochemistry, morphology) with more recent biological disciplines (molecular genetics and genomics) to study the role of plants in the global environment. The discipline emphasizes the study of plants from the sub-molecular levels to the organismal level. Relevant applications include biotechnology, bioenergy, agriculture, biomedical, food science, bio informatics, and genetic counseling.

Advising for the major is available in the CNR Office of Instruction & Student Affairs in 260 Mulford Hall. Students may drop in or schedule an appointment during advising hours: M, Tu, Th, F 9am-12pm and M-F 1-4pm. Visit the GPB Major website for more detailed information: [https://nature.berkeley.edu/advising/majors/genetics-and-plant-biology](https://nature.berkeley.edu/advising/majors/genetics-and-plant-biology)

### Getting a Degree

To earn a Bachelor of Science from UC Berkeley in Genetics and Plant Biology, students must fulfill unit and GPA requirements, university and campus requirements, college requirements, and major requirements. Please see reversed side for more details about the major requirements. Feel free to contact the major advisor for further questions.

### UC Systemwide Requirements

- Entry Level Writing
- American History
- American Institutions

### UC Berkeley Requirement

- American Cultures

### College and University Unit Requirements ✦ GPA Requirements

- 120 Total Units
- 36 Upper Division Units
- 15 Upper Division Units must be completed in the College of Natural Resources (This is fulfilled by the GPB Upper Division Core Requirements)

Students must maintain a 2.0 cumulative GPA, a 2.0 GPA in their GPB upper division major requirements, and not receive a grade below C- in their major requirements (lower and upper division courses).

*Updated 9/18/17*

<th>Plant Biology Concentrations: Choose from Option 1 or 2</th>
</tr>
</thead>
</table>

Option 1: Choose a concentration from below and select five courses for a minimum of 14 units.

**Option 2 (Experimental Plant Biology Concentration): Design your own concentration. Choose any five courses for a minimum of 14 units from the Plant Biology Concentrations below.**

### Biotechnology and Bioenergy
- PMB C103: Bacterial Pathogenesis [3]
- PMB C112: General Microbiology [4]
- PMB C112L: General Microbiology Lab [2]
- PMB 120: Biology of Algae [2]
- PMB 120L: Laboratory for Biology of Algae [2]; must be taken concurrently with PMB 120
- PMB 122: Bioenergy [2]
- PMB C148: Microbial Genomics and Genetics [4]
- PMB 170: Modern Applications of Plant Biotechnology [2]
- PMB 180: Environmental Plant Biology [2]
- PMB 185: Techniques in Light Microscopy [3]
- PMB C192: Molecular Approaches to Env Problem Solving [2]
- ESPM 152: Global Change Biology [3]
- IB 117: Medical Ethnobotany [2]
- IB 117LF: Medical Ethnobotany Laboratory [2]
- IB 151L: Plant Physiological Ecology Laboratory [2]
- PMB H196/199: Research [2-4]

### Plant Diversity and Evolution
- PMB 113: California Mushrooms [3]
- PMB 120: Biology of Algae [2]
- PMB 120L: Laboratory for Biology of Algae [2] must be taken concurrently with PMB 120
- PMB 180: Environmental Plant Biology [2]
- PMB 185: Techniques in Light Microscopy [3]
- ESPM C105: Natural History Museums & Biodiversity Science [3]
- ESPM 108B: Environmental Change Genetics [3]
- ESPM C149: Molecular Ecology [2]
- ESPM 152: Global Change Biology [3]
- IB 102LF: California Plants [4]
- IB 117: Medical Ethnobotany [2]
- IB 117LF: Medical Ethnobotany Laboratory [2]
- IB 151L: Plant Physiological Ecology Laboratory [2]
- IB 154: Plant Ecology [3]
- IB 154L: Plant Ecology Laboratory [2]
- IB 163: Molecular and Genomic Evolution [3]
- PMB H196/199: Research [2-4]

### Plant Genetics, Genomics and Bioinformatics
- PMB C134: Chromosome Biology and Cyto genetics [3]
- BioE 144(L): Intro to Protein Informatics [4]; 144L optional [2]
- PMB C148: Microbial Genomics and Genetics [4]
- PMB 165: Plant Microbe Interactions [3]
- PMB 170: Modern Applications of Plant Biotechnology [2]
- PMB 185: Techniques in Light Microscopy [3]
- IB 163: Molecular and Genomic Evolution [3]
- MCB 130: Cell and Systems Biology [4]
- ESPM C105: Natural History Museums & Biodiversity Science [3]
- ESPM 108B: Forest Genetics [3]
- PMB H196/199: Research [2-4]

### Plant Microbe Interactions
- PMB C103: Bacterial Pathogenesis [3]
- PMB C112: General Microbiology [4]
- PMB C112L: General Microbiology Lab [2]
- PMB 113: California Mushrooms [3]
- PMB C114: Comparative Virology [4]
- PMB C116: Microbial Diversity [3]
- PMB 120: Biology of Algae [2]
- PMB 120L: Laboratory for Biology of Algae [2] must be taken concurrently with PMB 120
- PMB 180: Environmental Plant Biology [2]
- PMB 185: Techniques in Light Microscopy [3]
- ESPM C105: Natural History Museums & Biodiversity Science [3]
- ESPM C149: Molecular Ecology [2]
- ESPM C152: Global Change Biology [3]
- IB 102LF: California Plants [4]
- IB 117: Medical Ethnobotany [2]
- IB 117LF: Medical Ethnobotany Laboratory [2]
- IB 151L: Plant Physiological Ecology Laboratory [2]
- IB 154: Plant Ecology [3]
- IB 154L: Plant Ecology Laboratory [2]
- IB 163: Molecular and Genomic Evolution [3]
- PMB H196/199: Research [2-4]

*Students seeking exception to the Math 10A and Math 10B requirement should contact the GPB major undergraduate advisor*
