Society and Environment Major Snapshot
Department of Environmental Science Policy, and Management

Social and environmental problems are deeply intertwined. This major introduces students to the main approaches and theory for environmental social sciences, including how social science tools can be applied to environmental problems, and how social science theories contribute to understanding environmental problems. At the upper division level there are three major areas of concentration. Students are exposed to all three areas and choose to focus in one: U.S. Environmental Policy and Management, Global Environmental Politics, or Justice & Sustainability.

The CNR Office of Instruction and Student Affairs is located in 260 Mulford Hall. Peer and academic advisors are available to answer questions about CNR majors MTuThF 9am-12pm, M-F 1-4pm.

Research Opportunities ♦ Career Options ♦ Honors Programs

Students with a GPA of 3.6 or higher may enroll in the College of Natural Resources Honors Program (H196) once they have reached upper division standing. To fulfill the program requirements, students design, conduct, and report on an individual research project working with a faculty sponsor. For more information, visit http://nature.berkeley.edu/advising/honors-program.

In addition to the UC Berkeley Undergraduate Research Apprenticeship Program (URAP), CNR students can also apply for the Sponsored Projects for Undergraduate Research (SPUR). More can be found at http://nature.berkeley.edu/research/undergraduate-research.

S&E Graduates are well-prepared for careers in fields such as environmental consulting, education, health, or law; community, urban, or regional planning; and other related areas of environmentalism in public agencies, non-profit conservation organizations, and private companies. Graduates are well-qualified for a variety of graduate programs, including law school.
