

SPONSORED PROJECTS FOR UNDERGRADUATE RESEARCH SPUR SUMMER LEARNING CONTRACT

The Sponsored Projects for Undergraduate Research Program (SPUR Program) encourages faculty and undergraduate students in the Rausser College of Natural Resources to collaborate on research projects by providing a grant to support their joint project. The funding for this program is generously donated by RCNR alumni.

During the academic year, students are required to be enrolled in an Independent study course (199) or an Honors research course. During the summer, students are not required to be enrolled in an Independent study course, but may instead complete a SPUR Summer Learning Contract.

Please meet with your mentor and complete and sign this form. Please provide all the following information:

STUDENT NAME:

STUDENT ID:

FACULTY MENTOR NAME:

SPUR PROJECT TITLE:

On a separate sheet, please provide the following details:
